# BACKED BY OVER
# 40 YEARS EXPERIENCE

Marlec Renewables proudly presents the VEVA EV Charger, the next-generation adaptive domestic smart EV Charger manufactured in the UK.

The VEVA charger is designed to be simple to install and operate, practical and aesthetic, compliant and future-proofed, intelligent, controllable, and affordable. With 40 years of expertise in renewable energy solutions, Marlec has developed the VEVA charger with the end user and installer in mind.

### COMPLIANT AND FUTURE-PROOFED

Veva adheres completely to all Smart Charge Point regulations and employs encrypted over-the-air programming, automatically updating its firmware. This ensures that the device remains current with the latest software, maintaining compliance and optimal performance at all times.

### INTELLIGENT AND CONTROLLABLE

The EV charger features a built-in multi-colour LED indicator, providing real-time feedback on its performance. Users can download the Veva App to monitor their charging status, remotely control the Veva charger, and adjust charging schedules.

### CHARGE FROM PV ARRAY:

Veva offers a range of customisable charging modes that the homeowner can set up via the mobile app. Options include a cost-saving mode that utilises PV-generated energy, a fast cost-saving mode combining grid and locally generated energy, or a fast-charging mode using grid energy.

### INTERCHANGEABLE FASCIAS

Veva's design incorporates interchangeable fascia panels, allowing homeowners to choose from 4 styles to match their property's aesthetics perfectly.

### WI-FI CONNECTIVITY

Every Veva charger comes equipped with built-in Wi-Fi connectivity, ensuring easy connection to the Veva mobile app for seamless control and monitoring.

### FULL CONTROL

By utilising the Veva app alongside your Veva charger, you gain access to a range of powerful features. These include Boost charging, allowing you to override charging schedules for immediate charging needs, Holiday mode, which prevents unauthorised charging while you are away, and anytime charging, providing convenient control over the charger's on/off status. These features grant you greater flexibility and control over your EV charging experience.

### DYNAMIC REPORTING

Veva reports offer a comprehensive breakdown of your charging activities, including charging duration, consumption, and other charging patterns. By inputting your energy tariff costs in the settings, you can easily view the charging costs of your current session, daily expenses, monthly costs, and even customise the reports to suit your preferences. This allows you to have a clear understanding of your charging expenses and make informed decisions about your charging habits.

# VEVA – 7.4kW DOMESTIC EV CHARGER

## VEVA TETHERED

## VEVA UNTETHERED

◊ Includes a built-in Type 2 cable holder, eliminating the necessity for a separate wall cable holder installation.

◊ Type 2 charging cable can be conveniently wrapped around Veva for easy storage between uses and securely locked into the built-in holster.

## ADJUSTABLE PRICING FOR ACCURATE REPORTING

Using the Veva app, you can manually set weekday and weekend pricing, enabling accurate reporting on daily and monthly charging costs. If electricity prices fluctuate, the app allows you to easily adjust these settings at any time, ensuring you stay in control of your charging expenses.
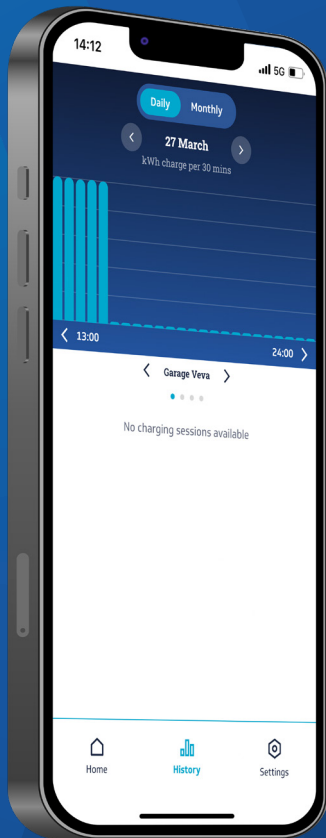

## REAL-TIME DATA

View real-time charging status, monitor charging performance and charging history with the Veva mobile app.

## CHARGING FROM THE PALM OF YOUR HAND

Our intelligent mobile app grants complete control to the EV owner, allowing you to easily manage and adjust you charging status. With a simple press of a button, you can boost or pause charging for convenience and flexibility.

## CHARGING HISTORY ANALYSIS

We make charging analysis easier. Filter by day or month and drill into how much each charge costs, the added kWh and charge duration.

## FULL ACCESS AND CUSTOMISATION

With absolute access, you have the freedom to customise the charger settings according to you preferences. You can modify features such as Charging Schedules, user list, and Charger Name. Additionally, the 'Holiday Lock' mode ensures the charger's protection regardless of your location, providing you with complete control and peace of mind.
