## ecoAIR PRO

### Technical data

- 0 Inverter technology and R290 natural refrigerant.
- Thermal power modulation (20-100%) and production pump speed control (20-100%).
- Hidrokits to achieve compact installations: DHW 3-Way valve, filter, filling kit, separator-exchanger, circulation pump, support electrical heater and DHW tank.
- Active cooling production on all models.

## **Production management**

- Integrated energy meters.
- Defrost method (DDC), more power in less time, the cycle is reversed without stopping the compresor.

Air-to-water heat pump

- Possibility of integration with PV systems.
- ECOFOREST control strategies.
- The use of propane as a refrigerant ensures that temperature and power delivered is stable even under extreme external temperatures.

## Inverter technology - natural refrigerant

# ecoAIR PRO

Inverter technology

Power ranges: 1-7 kW / 1-9 kW / 3-12 kW / 3-18 kW Natural refrigerant: R290 Hot water production temperatures up to 75°C Domestic hot water production Heating and pool production Integrated active cooling production Modulating speed fan Internet connection through the ecoSMART Easynet Integrated photovoltaic hybridisation

Single-phase (230V) or three-phase (400V) power supply

## **Indoor units**
